

AUDITORIUM PROJECT UPDATE

The Board of Directors of the Central Springs Community School District approved proceeding to construct an auditorium at the high school site at their regular June, 2018 meeting. The Board held discussion including the feasibility of and future plans for the Spectator Gym, area architect firms, and which option would work best for our district.

Following discussion and review, the Board unanimously voted to approve moving ahead on the option- Multipurpose Auditorium without fixed seating, and to continue with the Atura Architect Firm.

Financing for the proposed facility will be paid from Capital Project (SAVE) (penny sales tax) funds already in the bank and a major contribution from the WCDA. At this time there have no other contributions or funding sources. There will be no bond referendum or property tax increase for the Central Springs district for this construction project.

Due to several days of delay including weather conditions, we anticipate completion of the project by the Christmas break.
